Factory-built systems, configured by project

Shandong Ledi Environmental Protection Technology Co., Ltd. supplies industrial air treatment equipment to engineering companies, factories, contractors, and importers.

CORE CAPABILITIES

01 Project configuration

Equipment dimensions, airflow, modules, controls, and layout are reviewed against project requirements.

02 Factory assembly

Steel frames, treatment sections, ducting, fans, and control cabinets can be assembled before export.

03 Export coordination

Drawings, production photos, packing coordination, and direct technical communication support buyer evaluation.

Integrated Exhaust Treatment Line

Skid-mounted industrial exhaust treatment equipment combining treatment chambers, ducting, fan, control cabinet, and project-specific modules.

APPLICATIONS

- Industrial exhaust treatment
- Workshop air handling
- Project-based emission control

PROJECT CONFIGURATION

BUILD

Project-customized module

CONFIGURATION

Fan, ducting, cabinet, treatment chamber

SUPPLY

Factory assembled and export packed

SUPPORT

Drawing review and configuration matching

Modular Air Handling Unit

Large air handling module for industrial ventilation, filtration, odor control, and process exhaust systems.

APPLICATIONS

- Industrial ventilation projects
- Dust or odor control lines
- Process air treatment

PROJECT CONFIGURATION

HOUSING

Metal enclosure structure

LAYOUT

Horizontal or project-defined

INSPECTION

Service doors and access windows

CUSTOMIZATION

Dimensions and air volume by project

CO Furnace Treatment Module

Factory-built treatment module for integration into industrial process exhaust and combined treatment lines.

APPLICATIONS

- Process exhaust handling
- Industrial workshop systems
- Integrated treatment lines

PROJECT CONFIGURATION

MODULE

CO furnace treatment section

ASSEMBLY

Pre-assembled steel frame

CONTROLS

Control cabinet available by project

DELIVERY

Export packing and site coordination

Send your operating data and project drawings

INCLUDE WHEN AVAILABLE

- 01 Project country and application
- 02 Required airflow and operating conditions
- 03 Available drawings and installation space
- 04 Required quantity and delivery timeline
